**DESCRIPTION:**

12" Caster and bracket allows a rolling Steeldeck® platform to be built at a finished height of 12". Four casters are used per platform, and platforms can be joined together to make larger rolling stages. Made from steel, with a non-marring rubber wheel. Each caster is fitted with a brake which prevents the wheel from both rolling and castering. Wheels caster within the plan of each deck, so platforms can be brought together. Ideal for rolling drum risers.

- Caster Sleeve
**"Oops" Clamp**

**DESCRIPTION:**
There’s a reason for the name: when a stage is already built with four legs per platform, and later needs to have bracing added, this clamp is fitted to pairs of legs around the perimeter. Diagonal tubes can be added using the half swivel to add stiffness. Formed steel clamp which connects two parallel pipes, with a half swivel to add a third pipe.

**TECHNICAL SPECIFICATIONS:**

<table>
<thead>

- Caster sleeve

**Inset Post**

**DESCRIPTION:**
Steel bracket which clamps in to a Steeldeck® platform cornerpost. It has its own socket which allows the leg or caster sleeve to be inset from the perimeter of the platform. This is essential when butting up two rolling platforms, so the casters do not collide or interfere with each other. It is sometimes used to avoid a leg hitting an obstruction in a building, such as theatrical seating or floor vents.

**TECHNICAL SPECIFICATIONS:**

<table>
<thead>

---

**Adjusting Foot**

**DESCRIPTION:**
Swiveling adjusting foot uses a ¾” – 10 thread to make up to 4” of height adjustment to a pipe leg. Locking nuts are fitted to prevent creeping in use. Larger teardrop-shaped base plates are available to allow the foot to be bolted down to the sub-floor. Useful in situations requiring small height adjustment, such as orchestra pits. Finish: black glass reinforced nylon foot and zinc plated steel thread. Adjustable foot for sale only.
